PROFESSIONAL EXPERIENCE

Senior Data Scientist

Jan 2023 – Present

Infosys Ltd., Pune

- Developed a transformer-based NLP sentiment pipeline on 2M+ customer reviews, improving satisfaction score prediction accuracy by 34% and reducing manual tagging effort by 60%.
- Engineered real-time fraud-detection model (XGBoost + LSTM) deployed on AWS SageMaker, cutting false positives by 27% and saving ₹1.2 Cr annually.
- Built interactive Power BI / Plotly Dash sales-intelligence dashboard used by 150+ stakeholders, reducing report turnaround from 3 days to 2 hours.

Data Scientist

Jun 2021 – Dec 2022

Wipro Technologies, Bengaluru

- Trained PyTorch CNN for medical image classification (99 k images); achieved 92% F1-score, outperforming previous rule-based system by 18 pp.
- Automated feature-engineering pipeline with Scikit-learn and Pandas, cutting data-prep time by 45% across 6 product teams.
- Maintained and optimised AWS EC2/S3 infrastructure for ML model serving; reduced inference latency by 30% through batching strategies.
